

UDI 360 BENEFITS

- **DEVICE & TISSUE TRACKING**
Automated tracking of medical devices & tissue implanted during surgery.
- **ANALYTICS**
Analytics support clinical outcome and enable device purchasing decisions.
- **REGULATORY COMPLIANCE**
Uses FDA mandated UDI markings to comply with current Joint Commission medical device tracking standards and facilitate easy identification of recalled items.
- **IMPROVED COMMUNICATION PROCESSES**
UDI 360 facilitates communications between departments, hospital systems, patients, and manufacturers.
- **LOW INFRASTRUCTURE IMPACT**
UDI 360 requires less than an hour to train OR personnel. No software to install.

INSTANT POINT OF SALE INFORMATION, USAGE STATISTICS, AND DEVICE TRACEABILITY.

Federal regulation requires Unique Device Identification (UDI) labels be present on all packaging for implantable devices by September 2015. UDI 360 is a cloud hosted application providing a 360-degree view of UDI marked implant devices highlighting lifetime performance metrics. This software links the tracking, life-cycle events, and stability of the implanted device, resulting in full spectrum visibility to the FDA, the hospital, the manufacturer, and the patient.
